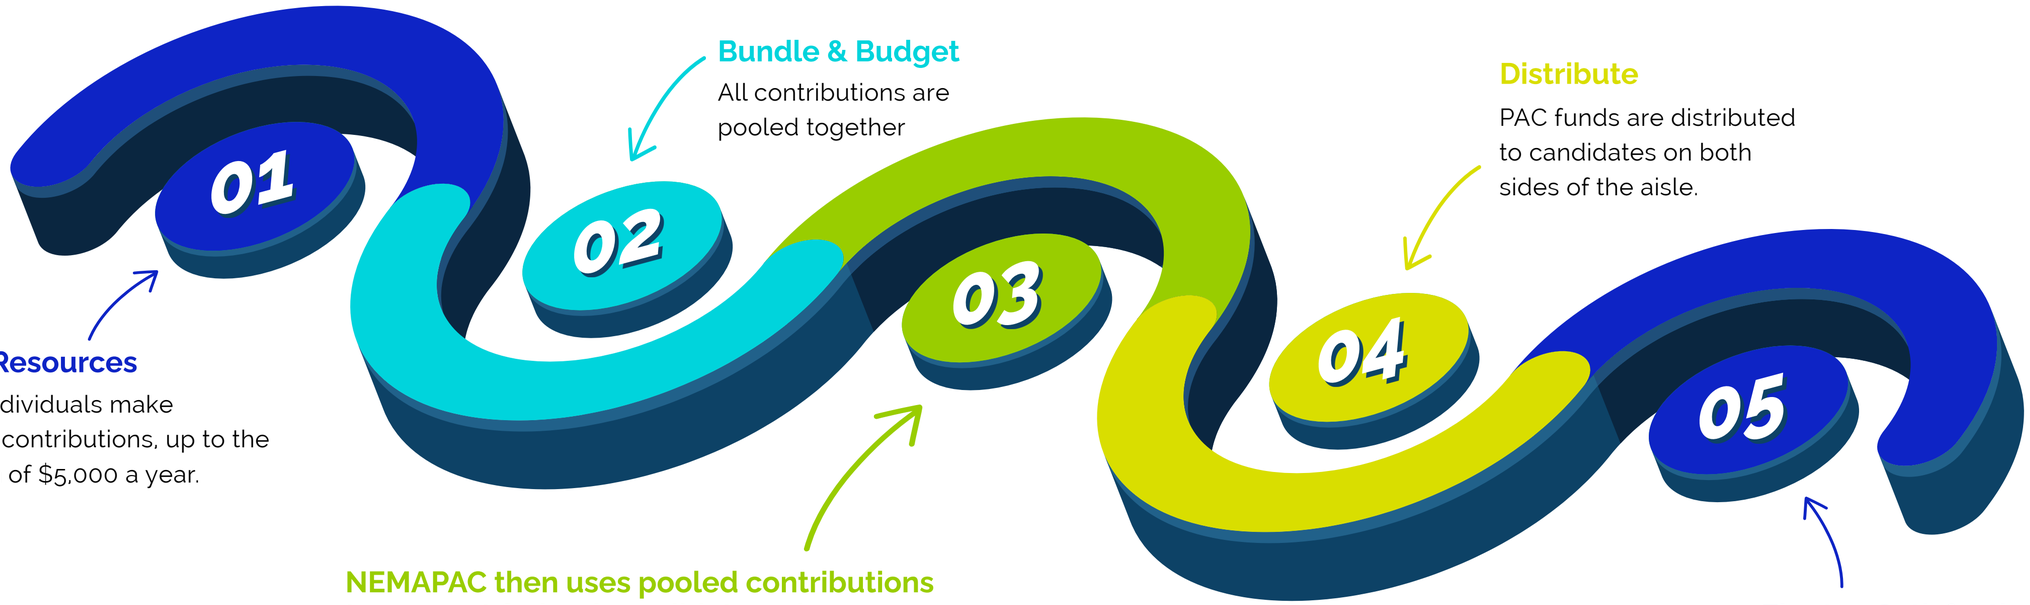
The Path of a PAC Dollar

When evaluating whether to support NEMAPAC, you're likely asking yourself: ***Where will my contribution go?***



Gather Resources

Eligible individuals make voluntary contributions, up to the maximum of $5,000 a year.

Bundle & Budget

All contributions are pooled together

Distribute

PAC funds are distributed to candidates on both sides of the aisle.

NEMAPAC then uses pooled contributions to support federal candidates who:

- Represent, through their state or district, a plant or office of a NEMA member company
- Demonstrate a constructive approach to electroindustry issues
- Serve on the leadership team of their political party
- Serve on committees of important jurisdiction
- Have potential for election success
- Have received NEMAPAC support in the past
- Demonstrate good moral character and integrity
- Other (e.g., constituent service and in-district activity)

Electro-Satisfaction!

PAC-supported champions impact policy issues that promote our mission to advance domestic growth and innovation for electroindustry manufactuers.

With NEMAPAC, the dollars in your wallet have the power to accomplish real change for you and the whole electroindustry nationwide.
